AccuFund®

Web Payment

WHAT IT DOES FOR YOU

The **AccuFund Web Payment** component allows customers to make payments for outstanding bills over the internet. **Web Payment** allows municipalities and non-profits to offer a convenient and secure online payment option to their residents and customers. **Web Payment**

and your AccuFund Accounting Suite installation providing a secure communications link.

When a customer goes to your web payment page to pay a bill, they enter information that identifies them uniquely. The system will display outstanding bills from all billing modules including **Accounts Receivable, Utility Billing, Court Fines** and **Property Taxes.** The customer can select which open items to pay and enters credit card information.

Once the customer clicks the submit button, the system will do the following:
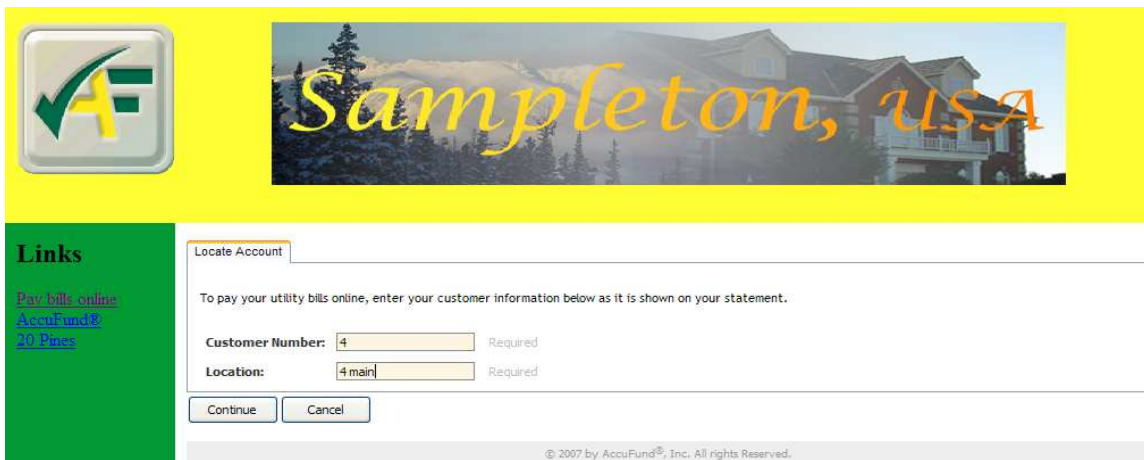

✓ Send the transaction to the *AccuFund Accounting Suite.*

✓ Communicate

After clicking to pay a bill the following screen opens to be completed for Utility Billing payments. Note this is on a sample website.

reduces cash receipt processing costs by letting clients pay their bills at their convenience over the internet. If a transaction type cannot be discounted by local ordinance, a "convenience fee" is added to the transaction.

HOW IT WORKS

Web Payment includes two components, a small web piece that sits on your website (or a page hosted by **AccuFund**) and a data server that communicates between the website and the **AccuFund** database. The web page can be integrated into your existing website with the simple addition of some code included with **Web Payment**. The data server component runs on a workstation in the DMZ (A section of your network exposed to the internet) of your local network installation. A communications port is opened in your firewall between the communications server

with the credit card processing company to process the transaction, determine the convenience fee, and get an approval.

✓ Create a receipt for the customer to print.

✓ Store the transaction in the **Cash Receipts** module in **AccuFund** and update billing modules as required.

OTHER FEATURES

✓ **Web Payment** works with all billing modules in AccuFund.

✓ The required web software is easily added to your existing website.

✓ If no website is available, **AccuFund** will host a payment page for the customer for a small monthly fee.

✓ **Web Payment** is secure, the two step communication

---

process provides a secure, encrypted communications path from customer to server.

COMPONENT INTEGRATION

Web Payment is integrated with:

- ✓ **Cash Receipts -** all transactions immediately update the Cash Receipts module allowing managers to track online payment activity.

- ✓ **Accounts Receivable** - all open invoices are available for payment through Web Payment.

- ✓ **Utility Billing** - all bills available to pay.

- ✓ **Property Tax** - all tax bills available for payment.

- ✓ **Court Fines** - for payment of fines received.

COMPONENT AVAILABILITY

Web Payment is available with both the Standard and Professional editions of the *AccuFund Accounting Suite*.
